## TO WHOM IT MAY CONCERN

In July, 2013 the Hamilton Boys' High School Board of Trustees appointed Lobell Construction Ltd to carry out seismic strengthening and a full upgrade of facilities in our Science block which forms part of our main building. Lobell's management team worked closely with the architect and school management to organise the work so it would result in minimal disruption to the school's daily routines. The work was to be carried out towards the end of the fourth term 2013, and over the Christmas break.

The main concern was to have the work completed by the beginning of the new school year. Through some fine organisation on Lobell Construction's part, the building was completed on time and on budget.

We now have a modern and fully functional building which will be a real asset to the school for many years to come.

The school board would like to thank Lobells for their commitment to the task.

Yours faithfully

Susan Hassall
