To Whom It May Concern

I would like to give a reference for Lue Shaw Builders for construction of my house, which was completed in September 2003. I found working with this company, the foreman John Green, and the builders who worked on our site to be a very satisfactory experience that went without hitch. I found it very easy to communicate with John and the team, and found him very attentive to any concerns or needs that I raised. They have built us a beautiful house and we have been delighted with the quality of craftsmanship employed, particularly the carpentry. The house appears to have been built very solidly and we have had no problems with weatherproofing. In fact we have only had minor, not unexpected problems arise during the eighteen months we have been living in the house. The project was completed on time and within budget.

I found Lue Shaw and his team very easy to work with, and very straightforward to deal with. If I were to be building again I would ask Lue to consider doing the job for me. I would thoroughly recommend Lue Shaw Builders to anyone building a large or more complex house, and in view of the fact that the house was built at a time of skill shortages, I was delighted to have such experienced, skilled builders working on our job.

I am of course very happy to answer any further enquiries in person.

Yours sincerely

JAMES STEWART
